

Wicked Globalists Are Causing Starvation and Poverty Under the Guise of Environmentalism

(2022/10/29)

<https://www.youtube.com/watch?v=tF5spyudTYA>

Description Section:

Read the full article here - <https://www.telegraph.co.uk/news/2022/10/28/eco-extremists-leading-world-towards-despair-poverty-starvation/>

Eco-extremists are leading the world towards despair, poverty, and starvation.

Utopian solutions for saving the planet are doomed to failure - and worse. We must wake up before it is too late.

Dr. Jordan B. Peterson examines the current energy crisis, the globalist ideology that simultaneously fuels it while calling for the sacrificial demise of the poor, and what this truly means for Europe's future, if not the entire world.

Dr. Peterson's extensive catalog is available now on DailyWire+: <https://utm.io/ueSXh>

Transcript: (auto-generated)

0:01

this winter

0:02

tens of millions of British citizens

0:05

including children will be tipped or

0:08

dumped into energy poverty severe enough

0:11

to risk permanent damage to their health

0:14

cold damp houses provide the perfect

0:17

breeding ground for mold that not only

0:20

causes respiratory distress

0:22

but renders houses essentially unlivable

0:25

once established

0:27

one left-leaning newspaper ran the story

0:30

outlining the danger but without a word

0:32

about why this crisis has emerged

0:36

because the woke moralizers of the

0:39

environmental movement helped create it

0:48

compassion callow self-aggrandizing

0:51

incompetent politicians there are

0:53

celebrity lackeys Machiavellian

0:55

journalists

0:56

have insisted ever more loudly over the

0:59

last five decades that no cost was and

1:03

is too great for others to bear in the

1:06

pursuit of blind service to the planet

1:11

it is irresistibly tempting at the

1:14

moment for those on that bandwagon to

1:17

single out and demonize Vladimir Putin

1:19

for Europe's energy woes but his current

1:22

machinations were utterly enabled by the

1:25

green ideologues anyone with eyes could

1:27

see a decade ago that the idiot insists

1:30

that Europe make itself reliant on

1:32

Russia for its energy security made the

1:36

current situation

1:37

inevitable

1:39

remember when President Donald Trump

1:41

populist Menace Numero Uno was marked

1:45

and derided by the intellectual and

1:47

political Elite in Europe and North

1:49

America for trumpeting precisely that

1:51

warning well now the chickens have truly

1:55

come home to roost

1:56

but very little has yet been learned in

1:59

consequence

2:00

virtue signaling utopians committed to

2:03

globalization claim we are destroying

2:06

the planet with cheap energy

2:09

but are they truly and deeply committed

2:11

to the environmental sustainability so

2:13

loudly and insistently demanded or they

2:16

merely hell bent in the prototypically

2:19

Marxist manner

2:21

in taking revenge on capitalism

2:24

it appears to be the latter

2:27

why otherwise would the mavens of the

2:29

environmental movement oppose nuclear

2:31

power

2:32

despite its optimal carbon footprint

2:36

why would they demonize the

2:37

exceptionally clean natural gas whose

2:40

fracking enabled production has allowed

2:43

the U.S to dramatically cut the very

2:45

carbon output that is so hypothetically

2:48

undesirable

2:49

utility bills have soared in the UK the

2:52

home of the Industrial Revolution that

2:54

lifted the world out of poverty

2:57

now up to half of small businesses in

3:00

Britain face the risk of bankruptcy and

3:02

closure

3:03

the government has had to announce a

3:05

ruinously expensive energy price

3:07

guarantee to mitigate the worst effects

3:10

of This Disaster

3:12

the rush to Renewables

3:15

the mentality among the eco-extremists

3:18

is as follows

3:19

if we have to Doom the poor to destroy

3:23

the system that made the rich so be it

3:26

you just can't make an omelet without

3:28

breaking a few eggs

3:30

here are some facts to remember well we

3:33

so madly and ineffectively rush to

3:36

Renewables

3:37

the International Energy agency recently

3:40

indicated that two decades of intense

3:43

support for such undertakings has hiked

3:46

the proportion of energy provided by

3:48

such means from 13 to 14 percent

3:52

to an utterly underwhelming

3:54

15.7 percent

3:57

if all governments deliver on their

3:59

current climate policies the world will

4:01

derive no more than 28 percent of its

4:04

energy that way by 2050. and a hundred

4:07

percent by

4:09

2207

4:11

not 20 30 or 2035 but 200 years later

4:16

does anyone on the liberal left accept

4:18

such projections or are they a mere

4:21

fabrication of the conspiratorial

4:23

right-wing conservative imagination

4:27

how about the Biden Administration

4:29

Biden's experts no doubt motivated to be

4:32

as optimistic as possible project that a

4:34

mere 27 percent of the energy produced

4:37

by 2050 will be carbon dioxide free and

4:41

that full CO2 eradication cannot

4:43

possibly occur

4:45

until 2242

4:48

42

4:50

an even more dismal guesstimation if you

4:53

regard such realities as dismal then

4:56

that put forth by the International

4:58

Energy agency

5:00

but

5:02

the tyrannical and emergency Justified

5:05

panicked crunch is not just happening in

5:08

the UK

5:10

in Spain officials now dictate that

5:12

commercial properties must not be heated

5:14

above 17 degrees Celsius or cool below

5:17

27 degrees Celsius upon pain of law

5:21

in Switzerland similar punishments are

5:24

being considered as part of a proposed

5:27

four-step plan for dealing with a gas

5:29

shortage which quote cannot be ruled out

5:32

this winter given the geopolitical

5:34

situation

5:36

the citizens of Germany likewise are now

5:39

in phase two of a three-stage emergency

5:42

plan following a reduction in gas flows

5:45

from Russia its main supplier

5:47

the plan involves bringing coal-fired

5:51

plants onto the market according to

5:53

German Minister Robert Habeck

5:55

despite them being quote simply poisoned

5:59

for the climate

6:00

and the potential of gas rationing for

6:03

industrial companies

6:05

so that supplies to homes and schools

6:07

Etc are not disrupted

6:09

the extended plan involves curtailing

6:12

the Christmas lighting that constitutes

6:15

part of the celebration in the midst of

6:17

the winter darkness in many locations

6:19

where they generally shine

6:22

nothing either beautiful or pleasing is

6:24

acceptable in the least to the grinch

6:26

and the Grinch was in fact green when

6:30

confronted by the crisis they created

6:33

remember

6:35

when the aristocracy catches cold The

6:38

Peasants die of pneumonia

6:40

if such Extreme Measures have become

6:43

necessary in the richest countries

6:46

what in God's name is going to happen in

6:49

the poorer ones

6:51

when the shortages strike the poor will

6:53

inevitably and necessarily turn to less

6:56

green resources many even in Germany are

7:00

already stockpiling firewood and coal

7:02

for the winter leading to acute

7:05

shortages

7:06

how is incentivizing people to cut down

7:09

and burn trees and use coal in their

7:12

fireplaces going to help reduce the

7:14

dreaded atmospheric carbon load

7:19

the actual poor versus the hypothetical

7:21

poor

7:23

perhaps we'll be able to comfort

7:24

ourselves here in the west with the

7:26

thought that the food we take for

7:28

granted will still be available at our

7:30

tables

7:32

but wait

7:34

the crops that nourish our populations

7:36

cannot be grown without fertilizer

7:38

loathed by Green folk and more

7:41

specifically without ammonia

7:44

and what pray tell is ammonia derived

7:47

from

7:48

could it be

7:49

Natural Gas

7:51

and how many people are dependent for

7:53

their daily bread on the industrial

7:56

generation and consequent white

7:57

availability of ammonia

8:00

only three or four billion

8:04

what happens to the continuous

8:05

production plants responsible for making

8:07

ammonia if the natural gas supplies are

8:10

halted even momentarily

8:14

they destroyed themselves as they were

8:16

not designed for such an unlikely event

8:19

and they cannot be restarted

8:22

the World Bank itself has recently

8:24

indicated that 222 million people

8:27

are already experiencing the threat of

8:30

starvation

8:31

described oh so nicely as food

8:34

insecurity

8:36

the Communists managed to kill a hundred

8:38

million in the last century with their

8:40

utopian delusions

8:42

we've barely begun to implement the Save

8:45

the Planet Nightmare and we've already

8:48

placed twice that number at risk

8:51

we are told an emergency confronts us

8:54

the climate crisis

8:57

the solution

8:59

the masses will have to tighten their

9:01

belts

9:02

to forestall an even worse future

9:04

catastrophe

9:06

the elite academics think tanks and

9:09

corporate consultants and the

9:10

politicians who subsidize their

9:13

intellectual pretensions

9:15

will not be particularly affected by

9:17

such tightening privileged as they are

9:21

but the actual poor

9:23

to such an elite they must be sacrificed

9:26

now to save tomorrow's hypothetical poor

9:30

and 222 million people is no doubt an

9:34

underestimate

9:35

as the food insecurity gets more severe

9:38

more countries will place restrictions

9:41

on food exports

9:43

that will harm the international supply

9:45

lines we all depend on

9:48

then when the consequences of that

9:51

manifest themselves increasingly

9:53

desperate politicians will begin to

9:56

nationalize and centralize food

9:57

distribution as the French and Germans

10:00

have already done on the energy front

10:01

and cut their Farmers off at the knees

10:05

who will in turn stop growing food not

10:08

out of spite

10:10

but because of dire economic

10:12

impossibility

10:14

then we will have engendered the kind of

10:16

feedback loop that can really spiral out

10:19

of control

10:20

it will be poor people who die first at

10:24

least

10:25

but as we all have all been taught by

10:27

the malevolent eco moralizers

10:31

the planet has too many people on it

10:33

anyway

10:34

think about this well you shiver all too

10:37

soon in your cold damp and increasingly

10:40

expensive and now substandard lodgings

10:43

you and your family may well have been

10:45

deemed an Expendable excess

10:50

food for thought

10:52

this is simply not acceptable

10:55

if you dare to claim the moral High

10:58

Ground well serving the cause of

11:00

starvation then by my Reckoning

11:02

you've placed yourself firmly in the

11:04

enemy camp and you richly deserve

11:07

whatever is coming your way

11:10

in the psychological and educational

11:12

Arenas too we demoralize young people

11:15

feeding them a constant diet of

11:18

concretized Apocalypse focusing

11:21

particularly on tempering or even

11:23

obliviating the laudable ambition of

11:26

boys hectoring them into believing that

11:28

their virtue is nothing

11:30

but the force that oppresses the

11:32

innocent and despoils the virginal

11:34

planet

11:36

and if that doesn't work and it does

11:38

then there's always the castration

11:40

awaiting the gender dysphoric

11:43

and you oppose such initiatives at

11:45

substantial personal risk

11:48

but we can reassure ourselves with the

11:51

fact that a beneficent government is

11:53

going to set up warm spots in public

11:55

libraries and museums this winter so

11:58

that freezing starving old people can

12:01

huddle together to keep warm

12:03

well their grandchildren cough up their

12:05

lungs in their frigid damp and moldy

12:08

Flats

12:09

in such circumstances in the face of

12:13

such mandatory privations and

12:15

manipulations it's obvious that the last

12:18

thing are tyrannical idiot panicked

12:20

virtue signaling government should be

12:22

doing

12:23

is directing their demented attention

12:25

toward regulating what people serve at

12:28

their tables but because meat has also

12:31

been deemed yet something else that is

12:33

destroying the planet the woke

12:35

narcissists of compassion are already

12:38

insisting that people eat less of it

12:41

plants and bugs for you and your

12:43

children peasants

12:45

and the sooner you get accustomed to it

12:47

or else

12:49

the better

12:51

let's turn our attention to the claim

12:53

that animal husbandry and the meat it

12:55

produces cheaply enough for everyone to

12:57

afford is unsustainable

13:01

for a moment because we haven't yet

13:03

dispensed with enough moralizing and

13:05

authoritarian stupidity

13:08

remember what happened the last time the

13:10

government agencies applied their tender

13:12

Mercy to determining what the people

13:14

they serve should consume

13:17

we were offered the much vaunted food

13:20

pyramid telling us to eat

13:22

6 to 11 servings of grains and

13:25

carbohydrates a day

13:27

with protein and fat at the Pinnacle

13:29

something to be indulged in with

13:31

comparative Rarity if indeed necessary

13:34

at all

13:35

that all turned out to be wrong and not

13:39

just a little wrong but so wrong that it

13:42

might as well have been not just wrong

13:44

but a veritable anti-truth something as

13:47

wrong as it could possibly get

13:50

the food pyramid was brought into being

13:52

not least by the U.S department of

13:54

Agriculture that is by marketers not

13:57

scientists or nutritionists with no

14:00

shortage whatsoever of Lobby efforts by

14:02

those whose products ended up being

14:04

promoted

14:06

the dietary recommendation to prioritize

14:09

carbohydrates

14:10

produced a veritable epidemic of obesity

14:13

a diabetes resulting in what has been

14:15

deemed by reliable researchers as one of

14:18

the worst Public Health disasters of all

14:21

time doing almost the entire Western

14:24

population to a lifetime of catastrophic

14:27

chronic health problems

14:30

42 percent of Americans are obese

14:33

another almost equally large percentage

14:36

are overweight at least a third are in

14:40

the early or later stages of diabetes

14:42

which is an exceptionally serious

14:44

disease

14:46

1.7 trillion dollars is spent annually

14:49

on chronic illness in the U.S

14:52

and the rise in such illness and cost

14:55

is directly associated with the

14:57

beginning of the god forsaken top-down

14:59

dietary guidelines that set us all on a

15:02

carbohydrate heavy dietary pathway

15:06

there have been in addition dozens of

15:08

studies debunking the claim that red

15:11

meat causes disease

15:13

the purer study p-u-r-e published in the

15:17

journal landsat in 2017 analyzing 140

15:21

000 individuals from 18 countries

15:23

revealed that quote higher carbohydrate

15:27

intake

15:29

not meat and fat note was associated

15:32

with an increased risk of total

15:34

mortality and that quote higher

15:37

saturated fat intake

15:39

was associated with lower risk of stroke

15:44

lower

15:46

that is exactly the opposite of what we

15:48

have been told by The Beneficial

15:50

centralizing agents who tasked

15:52

themselves with determining what we as

15:55

Sovereign and responsible individuals

15:57

should put in our mouths

16:00

so the health benefits of a pure

16:02

vegetarian and vegan diet are dubious at

16:05

best

16:06

but what of the argument that animal

16:08

husbandry is killing the planet

16:11

well the American Environmental

16:13

Protection Agency estimates that all

16:16

farming produces only 11 percent of

16:18

greenhouse gases in the U.S

16:20

Transportation produces 27 percent

16:23

livestock accounts

16:26

for three percent

16:28

and plant-based agriculture

16:31

five percent

16:33

according to the National Academy of

16:35

Sciences if we eradicated all

16:38

animal-based agriculture we'd reduce

16:40

greenhouse gases by a mere 2.6 percent

16:45

and it is no simple matter by the way

16:47

and perhaps impossible to manage a diet

16:49

that is sustainable in the medium to

16:51

long term by merely dining on plants

16:56

chew on that

16:59

Exodus

17:01

the pathway forward

17:03

what might we do instead if we chose to

17:06

be genuinely wise instead of inflicting

17:08

want and privation upon the world's poor

17:11

while failing utterly and disastrously

17:14

to save the planet

17:17

we could begin by assuming here in the

17:19

west that all those frightened into

17:21

paralysis and enticed into tyranny by

17:24

their apprehension of the pending

17:26

apocalypse have bitten off more than

17:28

they can properly chew

17:30

have taken on a dragon much more fire

17:34

breathing and dire than they are heroic

17:36

have failed entirely to contend with the

17:39

moral hazard

17:40

that comes in assuming that the faddish

17:43

emergency of their overheated

17:44

imaginations entitles them to the use of

17:48

power and compulsion

17:51

if your apprehension of the looming

17:53

catastrophe whatever its form has made

17:56

you into a terrified authoritarian

17:58

willing to frighten and compel to get

18:00

your way

18:01

you are simply not the right leader for

18:04

the times

18:06

as the unconscious manifestations of

18:08

your own nervous system telling you that

18:11

you are just too small for the job at

18:13

hand are clearly indicating

18:16

even to you

18:18

we could begin by dropping our appalling

18:20

attitude of moral superiority toward the

18:23

developing world

18:25

we could admit instead that the rest of

18:27

the planet's inhabitants have the right

18:29

and the responsibility to move toward

18:32

the abundant material life that we have

18:34

enjoyed despite ourself

18:37

for the last century and which has been

18:39

so entirely dependent on Industrial

18:41

activity and fossil fuel usage

18:45

we could work diligently and with

18:47

purpose to drive energy and food prices

18:50

down to the lowest level possible

18:53

so that we can ease the burden on the

18:55

poor and open up the horizons of

18:57

possibility so that they become

18:59

concerned as they inevitably and

19:01

properly will with long-term

19:03

sustainability instead of acting

19:05

desperately and destructively in pursuit

19:08

of their next meal

19:10

we could concentrate on an intelligent

19:13

plan of stewardship instead of

19:16

anti-human environmentalism

19:18

along the lines of the plans outlined by

19:21

multifaceted and diligent experts such

19:24

as Dr Bjorn lomberg who pointed out

19:27

years ago that we have a multitude of
19:29
crises facing us and not just one the
19:33
hypothetically apocalyptic danger of
19:35
carbon
19:36
and that we could spend the money we are
19:38
wasting killing poor people
19:40
in a much more intelligent judicious
19:43
manner
19:43
devoting some resources for example to
19:46
ensuring a stable food supply to poor
19:48
children in the developing world
19:50
treating malaria something we can do and
19:53
cheaply and delivering fresh water where
19:56
it is truly needed
19:58
we could as well work out the details of

20:00

a truly sustainable agriculture with the

20:03

most expert farmers

20:04

to improve the quality of our soil

20:08

and the air

20:09

and provide everyone with enough high

20:11

quality food

20:12

which will most definitely involve

20:15

animal-based agriculture we could bring

20:17

a halt to the presumption that the state

20:19

should extend itself by dint of its

20:22

hypothetical moral superiority to the

20:24

governance of how we heat our houses and

20:27

feed and provision our own families

20:30

we could finally

20:33

delegate authority to the most local

20:35

possible of levels

20:37

following the principle of subsidiarity

20:39

and produce a hierarchy of

20:41

responsibility that extends necessary

20:44

purpose to everyone individually at the

20:47

family and community and state level and

20:50

that serves as a necessary bulwark

20:53

against the Blind and luciferian

20:55

prideful intellect-based top-down

20:58

tyrannies of emergency and compulsion

21:01

that will otherwise necessarily reign

21:04

we could work out our concerns with

21:06

sustainability through consensus

21:09

and in the spirit of voluntary

21:10

Association and free play instead of

21:13

relying on top-down edicts justified in

21:17

principle by our misplaced existential

21:19

Terror and carrying with them the moral

21:23

hazard of the accrual of unjustified and

21:26

dangerous centralized Authority

21:29

we could distribute to everyone their

21:31

requisite responsibility as Sovereign

21:33

actors and could bring them on board

21:35

with the power of a common vision

21:38

one of life more abundant enough high

21:41

quality food for everyone enough energy

21:44

so that slavery becomes a thing of the

21:46

past

21:48

enough purpose so that nihilism and

21:50

decadence no longer beckon

21:53

enough reciprocity so that we live in

21:56

true peace

21:57

the generous provision of education and

22:00

opportunity to everyone in the world

22:02

the conviction to say it again that

22:05

policy based on compulsion is misguided

22:08

and counterproductive

22:10

we could thereby have our cake and eat

22:13

it too and so could everyone else

22:16

and we could work toward that in a

22:18

mutual Spirit of productive generosity

22:20

and fair play in competition and

22:23

cooperation

22:25

or we could let the world go to hell in

22:27

a handbasket

22:29

blame that disintegration on the very

22:31

enemies we specified as causal in the

22:34

first place those damned capitalists and

22:37

failed to clean up our own Souls as we

22:40

persecute the imaginary wrongdoers

22:43

responsible for the destruction of our

22:45

planet

22:47

identifying the real Danger

22:50

has the psychologist Carl Jung said in

22:53

the aftermath of the Nazi atrocities and

22:55

the use of nuclear weapons quote it is

22:58

becoming more and more obvious that it

23:00

is not starvation not microbes not

23:03

cancer

23:05

but man himself who is Mankind's

23:07

greatest Danger

23:09

for the simple reason that there is no

23:11

adequate protection against psychic

23:13

epidemics

23:14

which are infinitely more devastating

23:16

than the worst of natural catastrophes

23:19

that great man knew the technological

23:22

man had a stark choice in front of him

23:25

to become as ethical as he had become

23:27

powerful

23:28

and that a real hell awaited if we

23:31

refused the challenge

23:33

the rate of change is accelerating our

23:36

ability to do almost everything is

23:37

doubling faster and faster

23:40

as our ability to communicate and to

23:42

compute accelerates the consequence of

23:45

our inner disunity and insufficiency

23:47

become ever more serious

23:51

as we become individually more powerful

23:53

in other words we must take on more

23:56

responsibility

23:58

or else

24:00

if we fail to rectify our personal

24:02

pathologies of Pride envy and the

24:05

willingness to lie

24:07

we will find ourselves mired in conflict

24:09

with the world both natural and social

24:12

and in precise proportion to our refusal

24:15

to check the Devil Within

24:18

so we have a stark choice in front of us

24:21

we can reorient ourselves to the cause

24:24

of Truth

24:25

or we can act out the conflict imposing

24:30

ourselves serving instrumental delusions

24:32

on the world bringing about in that

24:34

manner an external apocalypse

24:37

that will result in precisely the same

24:39

judgment

24:41

and so in conclusion

24:44

it's time for all of us but especially

24:47

the self-righteous moralizers to get our

24:49

individual acts together

24:51

to take on some real moral

24:54

responsibility

24:55

instead of falsely broadcasting unearned

24:58

virtue far and wide and so cheaply and

25:03

carelessly
